

What is MESOTHERAPY?

Mesotherapy is a safe and effective non-surgical procedure to permanently eliminate inches of fat and remove cellulite. It has been used for over one hundred years to treat medical conditions such as sports trauma, neuralgia, vascular diseases and many other conditions. Mesotherapy as a cosmetic procedure was discovered in 1952 by French Physician Dr. Michel Pastor and has been used successfully all over the world.

With Mesotherapy, a patient can lose inches of fat and cellulite in problem areas such as the bra line, upper arms, abdomen, love handles, hips, thigh area and buttocks. Additionally, patients can take years off their appearance with Mesotherapy when it is performed on the jowels, double chin and neck.

A person's appearance can be transformed non-surgically - *with no down time* - by sculpting their face and body to create a more youthful and healthy appearance. Mesotherapy allows patients to wear bathing suits, shorts, tank tops and many other clothing items patients have thought they could never wear again.

NO SURGERY NO SCARRING NO DOWNTIME

Mesotherapy

BODY SCULPTING

REMOVE **FAT** DEPOSITS FROM TARGETED AREAS

Mesotherapy is the thrilling new alternative to plastic surgery for dramatically reducing fat deposits from problem areas such as the chin, stomach, thighs, lower eyelids, bra line and love handles. Mesotherapy is the only procedure that effectively reduces cellulite and eliminates Lipomas. Mesotherapy has been practiced widely in Europe for years and is now available in the United States from a few highly trained and specialized mesotherapists. We are now offering the Natural Bio Health Mesotherapy Program. This program combines the science of natural weight loss with the science of mesotherapy for incredible results.

Mesotherapy reduces fat and cellulite in the following areas:

- | | |
|--------------|--------------|
| Arms | Saddle bags |
| Bra line | Knees |
| Love handles | Buffalo hump |
| Abdomen | Lipomas |
| Hips | Chin/Neck |
| Thighs | Jaw Line |

Your alternative to cosmetic surgery and liposuction.
