

*replace damaged skin  
with new, fresh skin*

**I2PL Skin Rejuvenation** improves the appearance of photoaged skin by removing age spots (sun-induced freckles) and redness caused by broken capillaries.

## **I2PL Skin Rejuvenation**

is a cosmetic treatment designed to produce younger and healthier looking skin.

## **I2PL Skin Rejuvenation**

is the only procedure that can treat vascular redness, the unwanted appearance of Rosacea, pigmented brown spots, sun damage, skin texture, and collagen structure all at once.

**Your skin will become smoother, more radiant** and evenly textured with each treatment and can be used on face, neck, chest, legs, arms and hands. It is most effective as a series of 4 or more treatments.

*I decided to have skin rejuvenation due to broken capillaries around my nose and cheeks. After my first treatment, I realized how many freckles and age spots I had. Then, after four treatments, they were gone. What a bonus! I2PL is wonderful! I love the compliments I am getting on my skin and I recommend skin rejuvenation to everyone.*

*- Sandy S.*

*My skin has never looked better and people tell me how young I look. I am 44, but have the skin of a much younger woman. This is so much better than cosmetic surgery.*
